

# The Woodhaven AMERICAN ORIGINAL

## ASSEMBLY:

To assemble, bolt the horizontal bottom tube (B) on the inside of the welded end section (A)-see inset. Slide the bolts through from the outside of the rack to give a nice, clean look. The nuts have a nylon insert to prevent them from working loose. The threaded side of the nut goes on first and will require (2) 7/16" wrenches to tighten. Do not over tighten. Connect the horizontal bottom tubes (B) using the bent outside bracket (C), flat bracket (D) and the short bolts. The bent "foot" should face the inside of the rack with the bolts going through the bent bracket.

## COVER:

Woodhaven was the first to design covers to cover firewood the way it needs to be! It keeps the top dry and ready to burn, and allows for air to flow through the firewood to reduce mold and mildew and promote curing. Our standard cover fits around the uprights of the rack and moves down as the wood stack is used. Sewn-in wind straps may be used for windy conditions.

## IMPORTANT PLACEMENT:

To prevent the possibility of this product tipping over, it **MUST** be placed on a hard, level surface such as concrete or heavy concrete stepping stones. **NEVER PLACE THIS RACK ON DIRT OR ANY OTHER UNSTABLE SURFACE. CHILDREN SHOULD NOT BE ALLOWED TO PLAY ON THE RACK.**
